

Through industry-leading technology and optimized process management, the OptiFill prescription fulfillment solution enhances the pharmacy production process and increases overall operational efficiency.

OptiFill can manage every aspect of your physical fulfillment process, from host system hand off to order delivery. But more than that, it employs advanced validation and digital imaging processes that help ensure that every patient receives the right medication, at the right time - every time.

VA and DoD Outpatient Pharmacies

Experience more time for patients with OptiFill managing your fulfillment processes. Your patient wait times are minimized and your pharmacists can devote more time to consulting.

Health Systems and Integrated Delivery Networks (IDNs)

Using OptiFill in a centralized processing model, you can reduce supply and service costs while streamlining replenishment of all supplies to satellite offices, hospitals and clinics. OptiFill is also ideal for increasing hospital cost savings by providing pharmacy benefits to your employees when the system is used for in-house prescription fulfillment.

Retail Central Fill Pharmacies

OptiFill relieves the volume from overburdened satellite pharmacies while consolidating inventories of high-cost, low-volume medications. The system's flexibility and scalability provide the

foundation for high-performance central fill operations used by many of the nation's leading retail chains.

Filling Technologies

- **OF-5 Filling Unit** Offering unparalleled upgradeability, this system is ideal for pharmacies filling 8,000 to 60,000 scripts per shift.
- **OF-2 Filling Unit** Offers fully-automated labeling, filling, imaging and capping of oral solid medications. Ideal for mid-volume operations ranging from 800 to 3,500 scripts per shift.
- **FastFill™ 220** Ideal for lower volume pharmacies handling 500 to 1,500 scripts per shift. Additional units can be integrated to provide scalability for higher volumes, if needed.
- **FastFill 54** Supports lower levels of dispensing automation for specialized areas of the pharmacy. The FastFill 54 devices provide a secure dispensing option for controlled substances and may also be used as the primary dispensing system.
