

The next generation of actionable reporting insights and dashboards has arrived. ARi empowers you to leverage your ARxIUM data to make smarter, more efficient decisions for your pharmacy operation.

You've made a significant investment in technology for your pharmacy and, as such, there is a tremendous amount of data flowing in all different directions, with information critical to making sound decisions, operating efficiently and most importantly, safely. But as you know, just because the data exists doesn't mean you are able to leverage its full value.

Enter ARi, the latest and greatest pharmacy reporting and analytics tool from ARxIUM, designed to enable you to get the most from your data. ARi is the first cross-platform tool of its kind, designed with the diverse needs of the pharmacy in mind. So, whether you are analyzing a large number of automated dispensing cabinets in your hospital, managing inventory in disparate locations, operating a central shared pharmacy, all of the above, or something completely different, ARi is scalable and flexible enough to accommodate your needs.

- Industry-proven platform, tailored to ARxIUM customer needs
- Up to 10 years of cabinet data at your fingertips
- Drag-and-drop report builder; "expert" status not required
- Interactive tools and dashboards provide instant visibility, pharmacy-wide
- Much, much more ...

Want to learn more about ARi? Contact us today!

ARi will be rolled out to ARxIUM customers on an ongoing basis and an ARxIUM representative will be reaching out to discuss in more detail. In the meantime, if you have any questions, please don't hesitate to contact us at your convenience.
