The FastFill™ 180 represents our latest addition to the automated pharmacy solution lineup. It's a true game-changer as it seamlessly integrates with our RxWorks™ platform, offering enterprise-level inventory management and control capabilities, while also providing the flexibility to consolidate with your existing edge devices and accommodate future expansion needs. 180 adjustable "Universal Cassettes" makes it easy to respond to sudden changes in manufacturer

Leverage the newest generation of vial-filling robots to automate up to 180 of your fastest-moving oral solid medications. Accurately fill and label 500+ prescriptions or more per day of countable oral solid volume. Free up staff, increasing efficiencies, create new revenue opportunities.

VOLUME
180 Automatically-Calibrating "Universal" Canisters
Automatic calibration enables the user to adapt to sudden brand-to-generic or manufacturer changes and enables instant response on-site without having to order nor wait for additional canisters.

FLEXIBILE
Adapts to various vial and bottle sizes
FastFill 180 is configurable to utilize the most common vial or bottle sizes from various manufacturers.
*Please consult our sales representatives for more information.

CUSTOMIZABLE
Adjustable Label Printing Format
Users can customize the printing format based on their patients' needs, making it possible for users to improve adherence.

CONNECTED
Enterprise level control with RxWorks™ Pro
The new FastFill 180 is a key component of the ARxIUM™ integrated technology platform. We are changing the game for pharmacy. We deliver connection and control throughout the healthcare ecosystem, providing top line value and enterprise level inventory management for the Shared Service Center (inpatient and outpatient alike), hospitals, acute care, and retail facilities. Our solutions are configurable to meet the needs of any size operation.

ARxIUM
Innovative Pharmacy Solutions

Key Benefits
- Vision based canister auto-calibration
- Up to 90 vials 30 count per hour processing throughput capability
- Flexible solution for pharmacies that frequently experience medication changes
- Reduce operating cost
- Number of canisters: 180 universal-type canisters
- Canister auto-lock function
- Configurable label printing options
- User-friendly label replenishment
- Easy to load vial bin technology
- No cross contamination filling technology

Other Features
1. Embedded 15" Touchscreen for ease-of-use
2. Dispense history record-system

Optional Accessories
1. Additional security management via bio-metrics fingerprint scanner
2. Additional quality control measures through image capture during medication replenishment
