

FastFind™ Carousel

POWERED BY RxWORKS™ PRO

**HEAVY DUTY CAROUSELS
MAXIMIZE MEDICATION STORAGE,
IMPROVE DISPENSING SPEED,
AND PROVIDE DEPENDABLE
INVENTORY MANAGEMENT**

The FastFind Carousel powered by RxWorks Pro is a superior solution for pharmacies needing to maximize medication storage and dispensing speed. It uses a pharmacy's available vertical height to increase the number of items stored in the same footprint by up to 60%.

Carousel features

The carousel allows technicians to retrieve medications from a single location, while the ergonomic design minimizes bending and reaching by picking from waist height. The redundancies offered by a dual motor help significantly reduce the amount of downtime should a motor need service.

- Space for more than 2400 NDCs
- Support for HL7 and TCP/IP interfaces
- Dual, ISO9001 redundant user safety motors
- Stainless-steel work surface
- Pick-to-light technology
- Ergonomically-designed work height
- Manual override in the event of a power failure
- Fingerprint, badge or password sign-on
- Barcode scanning
- Optional label printing
- Option to add deep pockets to store large items

Inventory management with RxWorks Pro

The system is powered by RxWorks Pro software. Pharmacies can start by managing only the inventory in the carousel and expand the system over time to provide full pharmacy-wide inventory management to support even the most complex health system.

Enhancing safety and performance

The system enables the right inventory at the right place and time, but also allows staff to focus on core patient care duties.

- Barcode scanning, pick-to-light technology and a drug image database enhance the safety of dispensing operations.
- Cabinet replenishment goes faster through batch processing and grouping by shelves at carousels.
- A repeatable, dependable process is created that enhances the pharmacy's service level.

VERTICAL STORAGE SUPPORTS THOUSANDS OF PRODUCTS IN A VERY SMALL SPACE

Specifications

- Operating System** Windows Server 2008 R2 Standard Edition (64-bit)
- Database** Microsoft SQL Server 2008 R2 Standard Edition (32-bit)
- Client** Windows 7 Professional - SP1 (32 or 64-bit)
- Power** 208V, 3-phase, 20 amp, 5-wire
- Motor** Dual, ISO9001 registered, redundant user
- Clearance** Minimum 3" above carousel for assembly
Minimum 24" side clearance for maintenance access
Minimum 48" clearance for front maintenance

Heavy-Duty Carousels
